

# Kromite® Keystock

## Precision Cold Finished and Double Drawn

**Kromite Keystock** is a cold drawn product manufactured to the tightest tolerances for precision and accuracy. Uniformity and surface finish are controlled through a unique “double draw” process that increases the physical properties and refines the tolerances.

Strain hardened for maximum strength; do not confuse this product with commercial cold roll that is usually just a 1018, (mild steel). **Kromite Keystock** is manufactured specifically to develop high strength and precision tolerances.

### Advantages

- Fine Grain Structure
- Medium Carbon Content
- Sharp Square Corners
- Precision Close Oversize Tolerances
- Most Sizes May Be Thermally Treated To Higher Hardness

### Stock Lengths

10 Ft to 12 Ft Random Lengths

**“ASC” Tolerance Quality – the tightest in the industry.**

*Typical size tolerances on the English sizes of keystock are oversize (+.002”/- .000”). Typical size tolerances on the Metric sizes of keystock are undersize. (-.002”/+ .000”).*

### English Sizes Available

1/8” SQ	7/16” SQ	3/4” SQ	1-1/16” SQ
3/16” SQ	1/2” SQ	13/16” SQ	1-1/8” SQ
1/4” SQ	9/16” SQ	7/8” SQ	1-1/4” SQ
5/16” SQ	5/8” SQ	15/16” SQ	1-1/2” SQ
3/8” SQ	11/16” SQ	1” SQ	1-3/4” SQ

Also available in 2” SQ, please inquire

### Metric Sizes Available

5MM SQ	15MM SQ	32MM SQ
6MM SQ	16MM SQ	35MM SQ
8MM SQ	18MM SQ	40MM SQ
10MM SQ	20MM SQ	50MM SQ
12MM SQ	25MM SQ	
14MM SQ	30MM SQ	

Please contact the Cleveland office for **Stainless Keystock** requirements.

If your maintenance requirements call for undersize tolerances (in English dimensions), please see our **Kromite Cold Drawn** bar product located on Page 13.

Tubing and / or boxing is recommended to protect material in transit.
