

Plate Fabrication Services

Associated Steel Corporation has been providing fabrication services for over 65 years. Our Plate Fabrication and Machining Division routinely handles the most difficult maintenance and fabrication challenges.

Associated Steel Corporation will provide a complete fabricated assembly from your CAD drawings, or even your rough sketches. You will receive a finished product complete and ready for a problem-free installation. For details, please contact your local area sales representative or call the main office.

- Shape Cutting

We will gladly review your sketches or prints. We will quote from worn or new parts. Our quotation and application review is done without charge. Our services are limited to working with materials that are featured in this reference book. We guarantee all work performed by ASC, but cannot guarantee work performed by our customers or their agents. We reserve the right to decline quotation or fabrication at our discretion.
